INSTALLATION DIAGRAM:

SELECTING THE AUDIO SYSTEM:

If the vehicle is equipped with a Bose system, the SOCGM-18 has a built-in Bose adaptor that allows the proper audio input gain from the aftermarket radio to the Bose amplifier. To use this feature, plug in the male 8-pin connector on the harness to the GRAY female 8-pin connector on the SOCGM-18 module. The module is also labeled “Bose” and “Non Bose” to avoid confusion.

If the vehicle is NOT equipped with a Bose system, plug in the male 8-pin connector to the BLACK female 8-pin on the SOCGM-18 module.

CHIME VOLUME ADJUSTMENT:

The SOCGM-18 has a potentiometer to adjust the chime volume. It is set at half way by default. To adjust the volume, simply use a suitable screw driver and turn the potentiometer clockwise to increase the volume and counter-clockwise to decrease the volume.
