

PRODUCT FEATURES:

- Replaces the factory third brake light lens to maintain the OEM look.
- With 6 Infra Red LEDs for night time use.
- Uses 4-pin aviation type water resistant connectors.
- With selectable parking guide lines ON or OFF.

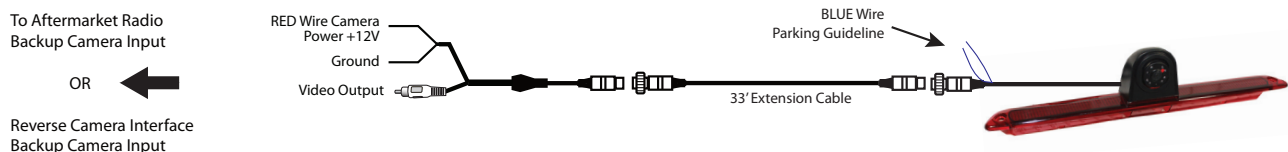

PARTS INCLUDED:

1. Third Brake Light camera
2. 33' extension cable
3. 4-pin aviation connector to RCA adapter

INSTALLATION INSTRUCTIONS:

1. Remove the factory third brake light lens.
2. Run the extension cable provided towards the radio.
3. Plug the 4-pin aviation connector of the extension cable to the camera cable.
4. Make the power and video connections at the radio.
5. Decide if the parking guide lines will be used or not. See below for instructions on how to turn it ON or OFF.
5. Test the camera prior to reinstalling in the third brake light location.

***NOTE:** To power the camera, use RED Wire A or B. If tapping power from the radio or RVC Interface, Power Plug A will not longer be used. If you will be tapping power from the reverse light +12V, power plug B will no longer be used. With either connection the Black GROUND wire needs to be connected to a solid chassis ground. For vehicles with manual transmission, we recommend tapping +12V power from the reverse light.

BLUE Wire: Disconnect to show parking guide line. Connect to remove. Insulate with tape to avoid from shorting.
Note: Cycle the camera power after connecting or disconnecting the control wire.

VEHICLE APPLICATIONS:

MERCEDES BENZ
2007 - 2017 Sprinter Van
